PROFESSIONAL SUMMARY

Web Developer with 2+ years of professional experience in forms development, website implementation, WordPress, PHP, JavaScript, MySQL, and production support. Recently promoted to Assistant Supervisor at Proweaver, Inc., following progression from Web Developer to Lead Developer. Experienced in hands-on implementation, troubleshooting, improving existing systems, and working within production codebases. Currently expanding skills in React, TypeScript, and Tailwind CSS through personal projects.

CORE COMPETENCIES

Forms Development | Website Implementation | WordPress Implementation | Production Support | Troubleshooting & Debugging | Legacy Code Maintenance | Technical Leadership | SMTP & Email Troubleshooting

PROFESSIONAL EXPERIENCE

Assistant Supervisor | Proweaver, Inc.

September 16, 2026 — Present

Recently promoted from Lead Developer to Assistant Supervisor; currently transitioning into the role while continuing to build on my experience in technical leadership and hands-on production work.

Lead Developer | Proweaver, Inc.

August 16, 2025 — September 15, 2026

- Led and coordinated a team of 12 developers, supporting implementation work, project delivery, and day-to-day technical questions.
- Continued hands-on work in forms implementation, website updates, automated email template customization, troubleshooting, SMTP/email delivery support, and production website maintenance.
- Enhanced the company's internal forms management system with separate developer and client workflows, improving data privacy, role-based access, and compatibility with newer PHP versions.
- Converted an existing Laravel/Vue multi-tenant forms management platform into a standalone deployment model for individual client websites.
- Collaborated with project coordinators and internal teams to ensure technical requirements were accurately implemented and project blockers were resolved.
- Mentored developers and provided technical guidance while balancing leadership with hands-on implementation.

Web Developer | Proweaver, Inc.

January 2024 — August 15, 2025

- Implemented and converted 440+ website forms using a proprietary forms platform, WPForms, Contact Form 7, Jotform, and other WordPress form plugins.
- Supported forms implementation, troubleshooting, and feature updates across hundreds of production websites.
- Modified and maintained existing PHP, HTML, CSS, JavaScript, and jQuery code to implement requested functionality.
- Configured WordPress themes, plugins, blogs, testimonials, shortcodes, and other website features based on project requirements.
- Used phpMyAdmin to review MySQL records, verify form submissions, troubleshoot issues, and create database tables using established company templates.
- Customized automated form notifications and auto-reply emails, including recipients, dynamic fields, and notification settings; assisted with SMTP and email delivery troubleshooting.
- Supported occasional Zapier and webhook integrations.

SELECTED PROJECTS

Online Forms Database Panel (OFDP) | Professional Project

PHP | CodeIgniter 3 | MySQL | JavaScript | jQuery

- Enhanced an existing production forms management system with separate developer and client workflows, role-based access, improved data privacy, and newer PHP compatibility.
- Developed migration and workflow improvements while working within an existing legacy CodeIgniter application.

AI-Assisted Form Conversion Workflow | Professional Project

Cursor AI | PHP | JavaScript | jQuery | HTML | CSS

- Collaborated with fellow developers to create a structured AI-assisted workflow for faster and more consistent online form conversion.

- Contributed conversion prompts, reference files, development guidelines, testing, and refinement while keeping developer review and validation in the process.

Standalone Forms DataPoint | Professional Project

Laravel | Vue 3 | PHP | MySQL | JavaScript

- Converted an existing Laravel/Vue multi-tenant forms management platform into a standalone deployment model for individual client websites.
- Worked on the standalone site-level workflow, authentication, and submission management within the existing application architecture.

Bohol Maranatha Christian Academy Portal | Academic Project

Laravel | PHP | MySQL | Blade

- Developed a Laravel-based school management portal with authentication, CRUD functionality, and database-driven features as an IT capstone project.

TECHNICAL SKILLS

Programming & Web: PHP, JavaScript, HTML5, CSS3, jQuery

Frontend / Currently Learning: React, TypeScript, Tailwind CSS

Frameworks: Laravel, CodeIgniter 3

CMS: WordPress

Databases: MySQL, phpMyAdmin

Forms: Proprietary Forms Platform, WPForms, Contact Form 7, Jotform

Development Tools: Git, Visual Studio Code, XAMPP, Cursor AI, ChatGPT

Integrations & Support: Zapier, Webhooks, SMTP Troubleshooting, Email Delivery, Production Website Support

EDUCATION

Bachelor of Science in Information Technology | Trinidad Municipal College, Trinidad, Bohol | 2019–2023

Capstone: Bohol Maranatha Christian Academy Portal — Laravel-based school management portal with CRUD functionality, authentication, and database-driven features.
